CAMPUSFLOW

Chapter Four: Implementation - Revised Draft

Demonstration project - sample academic content

Revision summary

This revision addresses the lecturer request to explain version history and document permissions.

Version history

Each submission records its category, chapter, file name, timestamp and review outcome. Students can revisit earlier files and upload a revised document beside a changes-requested state.

Private file access

Viewing and downloading use authenticated server routes. The application checks project membership before issuing a short-lived storage link.

Feedback and progress

Written comments and revision dates appear in the student Feedback tab. Only approved chapter stages contribute to the progress percentage.

Next step

This revised chapter is ready for lecturer review during the recording.
